

Images for the “Describe a Picture” extension activity

Preparation Instructions

- Print the following pages double sided so that one side of each piece of paper has images and the other side has the black background.
 - You can print these images in colour or in black and white.
 - The purpose of the black is to make it difficult to see through the paper from the back side.
- Once printed, cut each image out individually.
- For instruction on how to teach this activity, please refer to the teacher’s guide.
